PROFESSIONAL SUMMARY

AI-focused Full Stack Developer and MCA graduate with hands-on experience building modern web applications, RESTful APIs and AI-integrated solutions. Skilled in React.js, Next.js, Supabase, JavaScript, Python and MySQL, with experience integrating APIs, AI capabilities and production-ready application workflows. Strong problem-solving, rapid learning and AI-assisted development skills, with a focus on building scalable and user-centric web products.

EXPERIENCE

AI Native Developer | Aug 2026 – Present

Tech: React.js · Next.js · JavaScript · REST APIs · AI Coding Tools · Git/GitHub

- Developing AI-native web applications using React.js and Next.js while ensuring responsive, scalable, and maintainable user experiences, along with building and integrating REST APIs to enable seamless frontend-backend communication for reliable end-to-end functionality.
- Leveraging AI-assisted development tools like Claude and Claude Code to accelerate coding, debugging, refactoring, and feature development, while collaborating via Git/GitHub and following clean code practices.

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, HTML5, CSS3
Frameworks	React.js ,Next.js, Tailwind CSS
Databases	MySQL, SQLite, Supabase
Tools & IDEs	VS Code, Android Studio, Postman, Eclipse, Git, GitHub
Concepts	OOP, REST APIs, SDLC, Agile/Scrum
APIs / AI	Razorpay API, Google Vision API, OpenCV, ML Integration

PROJECTS

CampusCrave — Full Stack Food Ordering Platform

2025

Tech: React.js · Flask · MySQL · Python · Razorpay API · REST APIs · JWT Auth · GitHub

- Built secure JWT-authenticated ordering system with dynamic cart, combo logic, and menu items; integrated Razorpay for end-to-end payment flow.
- Developed ML demand prediction model improving inventory planning with ~85% accuracy; exposed all features via RESTful Flask APIs.

Real-Time Human Detection & Counting — Computer Vision App

2024

Tech: Python · OpenCV · HOG Descriptor · Background Subtraction · GitHub

- Engineered real-time people detection in live video streams with unique ID tracking to eliminate duplicate counts; applicable for crowd monitoring and retail footfall analysis.

Nutrition Analysis App — Android Application

2024

Tech: Java · Android Studio · Google Vision API · OpenAI API · SQLite · GitHub

- Developed an AI-powered app that analyzes food items using image recognition and provides nutritional insights.

EDUCATION

Master of Computer Applications (MCA)	CGPA 8.54/10	2024 – 2026
Pimpri Chinchwad University, Pune		
Bachelor of Computer Science (BCS)	CGPA 8.38/10	2021 – 2024
K. J. Somaiya College, Kopargaon, Maharashtra		
Class XII – HSC (Science)	88.17%	2020 – 2021
Shri Saibaba Junior College, Shirdi, Maharashtra		

CERTIFICATIONS & STRENGTHS

Certifications:

- Training Course In Java– Esteem Institute (Jan 2024)
- Training Course In C– Esteem Institute (Dec 2022)

Key Strengths:

Full Stack Dev • REST API Design • ML Integration • Version Control (Git) • Problem Solving • Team Collaboration
